

Barcoding

Kritarsh Negi

The CPAP Box

June 5, 2025

Outline

- 1 Major Actions
- 2 Changes of Scope
- 3 Measures
- 4 Road Blocks
- 5 Are we on time?

Actions Taken

- Deployed the website to Render: <https://frontend-e2jk.onrender.com/>
- Added more Quality Control features
 - ▶ Updated the flaw-no flaw dropdown with a specific checklist item for each flaw
 - ▶ Added the cursor auto focus on the relevant input field depending on the workflow
- Fixed the pricing bug and had it so that a broken CPAP machine is half off while broken supplies are zero dollars
- Added Auto Clear functionality after UPCs are added

Things to work on

- Format the notes better so that they are easier to read
- Testing
- Uploading images to Pipedrive via their API
- Adding the Serial Number matching functionality

Tools Used

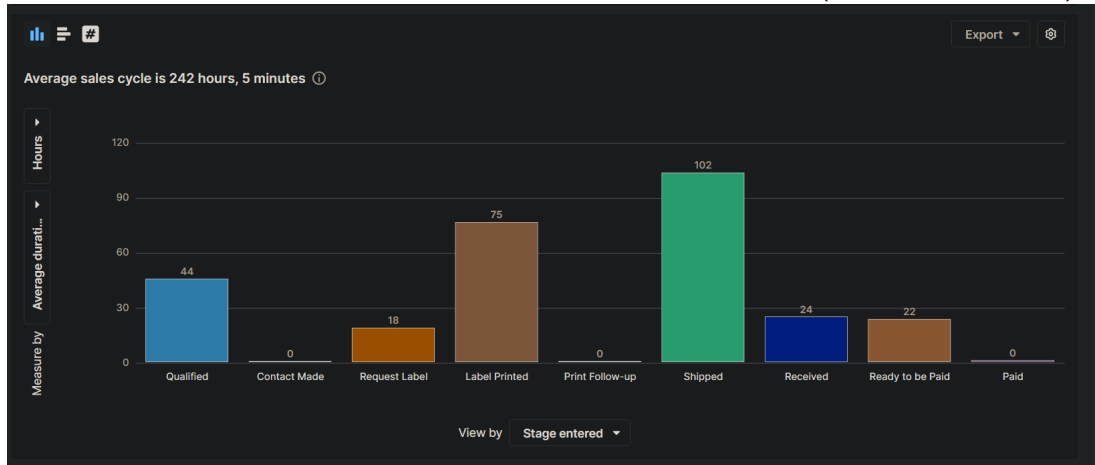

- Barcode Scanner
- Pipedrive API
- UPCCDatabase API
- Render
- Redis
- ReactJS
- ExpressJS

Changes of Scope

- The scope of the project has changed because I need to add the serial number tracking capability to the project and potentially connect it to AssetPanda

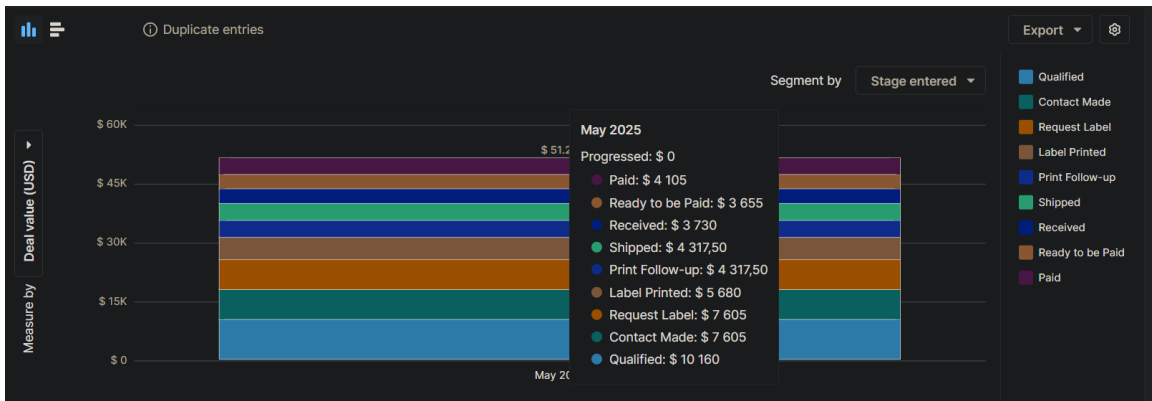

Measures

- Percent of SKUs that have UPCs
- Sales Cycle Time: This year, we've taken 24 hours on average between received and Ready to be paid, which in the future could be reduced to under 8 hours (within one workday)

Measures

- Number of SKUs that have been added to the system
- Number of SKUs that have been sold
- Number of SKUs that have been scanned
- Number of SKUs that have been matched to a Pipedrive deal
- Number of SKUs that have been matched to a Pipedrive deal and have an image uploaded

Road Blocks

- Writing to a new Spreadsheet with each scan of a CPAP machine
- Connecting the Images to Pipedrive
 - ▶ There may be problems with holding the images in my website because it would go over the data limits, so I'd either have to find a workaround or ditch the idea depending on how much space they are taking

Are we on time?

- Yes

- ▶ A rapid prototype of the project is done and now I need to test to work out the bugs and add functionality for flaw detection
- ▶ Work on Inventory management
 - ★ Work at finding a solution to the discrepancy between the inventory in Magento and the subscription model inventory
- ▶ Work on the SellMyCpap website
 - ★ dynamic pricing

Thank You

Thank You!
